PUBLIC HEARING - 3:30 P.M.

1. REZONINGS:

None for consideration at this time.

2. TEXT AMENDMENTS:

- A. An ordinance of the Common Council of the City of South Bend, Indiana, amending Chapter 21 of the South Bend Municipal Code, Article 3 Commercial / Mixed Use Districts to revise Permitted Uses and Development Standards - APC# 2855-17.

ANGELA SMITH: The petitioner is requesting a text amendment to repeal and replace Section 21-03.02 MU Mixed Use District. Since its adoption in 2004, experience has shown that development in the MU Mixed Use district frequently requires the use of variances and special exception use approvals, even to complete projects consistent with the neighborhood context. This ordinance revises uses and development standards to better support the development of the mixed-use urban neighborhood centers and traditional pedestrian-oriented design. Because the changes involve so many subsections within the chapter, the staff is suggesting a replacement chapter. Some of the changes include allowing private clubs and lodges as permitted uses, changing to a minimum project frontage instead of lot frontage in order to allow for integrated developments, reducing setbacks, eliminating plaza requirements, decreasing the minimum height, and updating the architectural standards to better reflect the desired urban design appropriate for the district. Based on information available prior to the public hearing, the staff recommends sending this petition to the Common Council with a favorable recommendation. Updating the MU Mixed Use District to better reflect the intent and application of the pedestrian-oriented district within the urban context will simplify development and strengthen the mixed-use neighborhood centers.

DAN BREWER: Are cell towers allowed in a Mixed Use District?

y a cell tower.

LARRY MAGLIOZZI: Cell towers, you have to go to the cell tower section which delineates or tells which districts they are allowed in.

ANGELA SMITH: There is a special chapter of the ordinance which address those.

LARRY MAGLIOZZI: I think they are allowed in all districts.

t take out any uses that were previously allowed. There was also one interpreted that they were both allowed.

LARRY MAGLIOZZI: I just found the section, cell towers are allowed in all uses.

MICHAEL DIVITA: I am a Planner with Community Investment. Offices located on the 14th floor County City Building. Community Investment worked closely with APC and Building Department staff on developing the language for the text amendments being presented here. Essentially, the existing MU

investment. As a result of that exercise, a series of changes are proposed to promote walkable, mixed use development in neighborhood centers through a more straightforward code. As with the other text amendments recently approved, these changes will reduce provisions that hold back investment and will decrease the number of rezoning, special exception, and variance requests that must be made but always get approved. By revising setbacks and bufferyards, the proposed amendments will allow property owners to more fully utilize their properties in instances where it does not negatively affect neighboring properties. These ordinance changes would allow buildings to be built in a manner more consistent with traditional design to better blend with the existing neighborhood. The building design and orientation changes presented here would also ensure better urban design outcomes in urban contexts and add to the vibrancy of business districts. I, then, would ask for your favorable recommendation on this text amendment (but would be happy to take any questions you might have on specific provisions).
